Paul Nohtiev

Dear Hiring Manager,

I am contacting you regarding your Company's Web Developer. I was working as a Web Developer at AV Metal Group for more than 1 year. During that time, I've assisted in designing and developing user-friendly websites, revamp web site security, and tested those sites' protection. I'm interested in working for your Company because I want to further my knowledge and interest in web development. I believe I'll offer new ideas to help your Company to reach and surpass the primary objectives mentioned in its job ad.

My core duties at AV Metal Group included designing & developing user-friendly interfaces, testing, and debugging websites. Additionally, our company's website security system worked effectively against a DDoS attack. Before this position, I worked as a Freelance Web Developer, where I was developing user-friendly websites.

This professional experience has helped me improve my leadership skills and become a better team player, allowed me to gain mastery over necessary development tools, and provided me with extensive knowledge of how to design & develop a user-friendly, secure website. I believe my skill set will benefit your Company, which has the clear potential to increase online revenue and expand its audience.

Besides, I should mention that I **worked as an International Social Media Ambassador at Conestoga College, where I have developed a Webpage for them while being a student.** I am looking forward to discussing the position and my qualifications with you in more detail soon.

Sincerely, Paul
